DETAILED ACTION

Applicant's arguments with respect to claims 6-9 have been considered, the 112 rejection is withdrawn, but new ground(s) of rejection is presented.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Seidel et al (US patent 4701684), of record.

Claims 6-7, Seidel et al teach a door control system comprising a motor M couple to the door, a temperature detector Di for detecting motor and ambient temperature; and a controller for operating the motor and changing the maximum threshold force Dsp when changes in temperature are detected, wherein the controller stops the motor when the maximum threshold is exceeded, see column 5 lines 3-43.

Claims 8-9, Seidel et al describe a method for operating a door comprising controlling the movement of the door in response to a maximum threshold, detecting a motor/ambient temperature, and changing the maximum threshold according the changes found in the temperature.
